HTC Superfloor™

Bring out the strength
in your floor!

Bring out the strength in your floor.

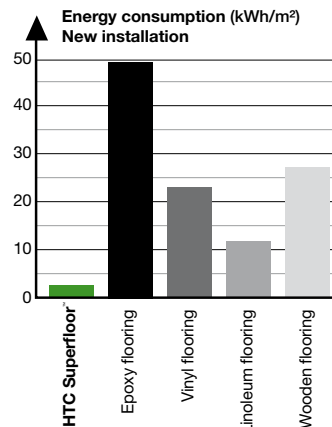

HTC Superfloor™ is the revolutionary flooring concept with a technique that makes your existing or newly installed concrete floor more than just strong and hardwearing. The technique is as simple as it is ingenious. HTC's machines and diamond tools grind and polish the concrete floors to remove the surface paste and expose the stronger concrete beneath. The result of this process is a stronger, more durable, shiny and beautiful floor. Both the environment and your bottom line benefit too.

The initial investment is the same, or lower, than for traditional flooring solutions, but the low maintenance cost and the longer lifespan make HTC Superfloor™ the most lucrative investment option. The life cycle cost is about **60% less** than for traditional flooring solutions. And using the Twister™ method of cleaning, you'll find your floor is simple, environmentally friendly and cost-effective to maintain.

HTC Superfloor™ is suitable for almost all environments; from the toughest industry and warehouse to home environment. It simply is a smarter floor!

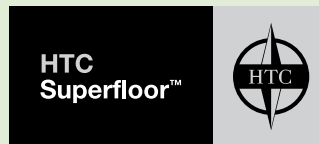

Toward a better environment.

Concrete is composed of pure natural materials. The coatings that are often applied to the concrete have an adverse effect on the environment. HTC Superfloor™ uses as much as 30 times less energy than traditional flooring solutions. HTC Superfloor™ contributes to a cleaner environment and also a better working environment. It has a low lifecycle cost, long endurance and is the natural flooring choice for the future in industry, warehouse, retail and public areas.

Not only is it economically advantageous to reduce energy consumption, it is environmentally beneficial too.

HTC Superfloor™

The benefits

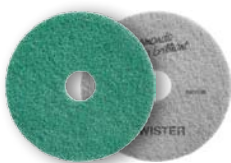

- 60% lower life cycle cost than traditional flooring solutions
- Just as good for new installations as floor renovations
- Infinite lifespan with Twister™ maintenance
- Low vibration levels for vehicles
- Environmentally friendly solution
- Slip-proof, even when the floor is wet
- Highest level of fire safety
- Easy-to-clean. No truck marks, etc.
- Aesthetically appealing

Applications

- Retail stores
- Design boutiques (aesthetical, trendy)
- Warehouses
- Industrial premises
- Truck isles (very low vibration level)
- Public areas like café, restaurants
- Home environment

Infinite lifespan. Only use water and diamonds.

By using the Twister™ system in the daily cleaning you will get an infinite lifespan of your HTC Superfloor™. The Twister™ cleaning method also allows you to keep all your floors clean, no matter what kind, with a minimum of effort. All that is required is water – no chemicals or polishing agents. This makes Twister™ gentler on floors and produces brilliant results. The diamond pads fit most of the scrubbing machines on the market and are easy to implement in the existing cleaning routines.
